Expression of Interest (EOI)

The Department of Water Resource (DoWR) is seeking to identify the number of potential contractors in the water sector around Vanuatu due to the increasing need for capacity to implement a range of activities to support communities with water safety and security to achieve the overall target of the National People's Plan. Such activities include waterworks (repair, upgrade, and construction of water supply systems) for works valued between 500,000 VUV to 100,000,000 VUV, Engineering survey and design of rural water supply systems and provision of existing water sector Trainings for communities (Community Development Training, Village Plumber's Training, Water Committee Management Training and Drinking Water Safety and Security Planning).

DoWR is pleased to invite all interested person/ organizations/ companies wishing to take part in the water sector to fill out application forms available at the **DoWR Offices in Port Vila, Luganville, Sola, Saratamata, Lakatoro and Isangel.**

Applications will go through a selection process and successful candidates will receive a notification. These candidates will be included in a registry which DoWR will use for its outsourcing of future works and activities.

This is an exciting opportunity anyone who is interested in the rural water supply sector of Vanuatu.

Application will close at 4:30pm on the 31st of May 2021.

Application forms can be obtained also by contacting this email address: esteitoka@vanuatu.gov.vu or call +678 33435 and ask for Esther Teitoka.
